

TalkMaster™ FOCUS

Automation Tools

Powerful Windows™ software for automating actions with your IP audio products.

Description:

TalkMaster™ FOCUS is the industry-leading platform for managing IP audio endpoints. IP7 intercoms, speakers, amplifiers, horns, and zone controllers can be connected over local and wide-area networks.

TalkMaster™ Focus Automation Tools (SW-TMF-AT) provides the ability to automate and customize audio messaging using predefined conditions and time of day. Utilize TalkMaster's Text-to-Speech capabilities with RSS/CAP:Atom feed reading for emergency notifications and informational messages.

Features:

- “If this...then that” capability
- Panic button support
- Trigger pre-recorded audio files
- Schedule automatic announcements
- Administrator alerts for system interruption
- Converts RSS/CAP:Atom Feeds to Speech

Automation Tools is mission critical & operator friendly. SW-TMF-AT can be found in:

- Education (K-12 & Higher Ed)
- Transportation & Parking
- Military & Government
- Industrial & Manufacturing
